1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-14, 16-21 and 23-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Takita et al., as set forth in the previous Office action. With regard to the aspect in amended claim 12 that the hot solvent treatment is performed on the gel-like formed article, it is noted by the examiner that a solvent treatment is described by Takita et al. at column 6, lines 47-60. But since the gel-like article is heated for the stretching step immediately prior to this solvent treatment, it is submitted that the solvent subsequently applied is inherently heated such that claim 12 is still readable on the reference. It appears that if claim 12 is amended to describe the condition of the solvent with regard to its temperature before contacting the gel-like formed article, then the claim would no longer be readable on the reference.

2. Claims 15 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Applicants' arguments filed March 2, 2007 have been fully considered but they are not persuasive. Applicants argue that the disclosure in Takita et al. at column 5, lines 29-32 refers only to the dissolution of the polyolefin to make the heated solution that it is extruded through the die. But, in maintaining the rejection, the examiner is relying on different portions of the disclosure of this reference, as described above.

**4.THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
